

WE TAKE 'SERVICE' SERIOUSLY AT VIALTUS SOLUTIONS

That's why our Enterprise Hosting packages are designed to meet the needs of your business now, and, most importantly, as your business grows. From the outset, we can help you choose the level of service that suits your needs.

Vialtus Enterprise Hosting provides your business with the infrastructure to support your data and web presence.

Enterprise Hosting is a family of best-of-breed server offerings that enable organisations to establish and maintain initiatives across the Internet, intranets and extranets. Reliable, cost-effective servers that eliminate the need to maintain dedicated staff, allowing in-house IT teams to be more effectively utilised in accomplishing more strategic business objectives.

Designed for organisations that need a Managed Hosting platform but lack the time, resources and/ or expertise to effectively implement, support and manage their web-enabled initiatives 24-hours a day.

YOU CAN ENJOY:

Service

Peace of mind that our Enterprise Hosting solution flexibly meets your needs, by offering a choice of hardware specifications, operating systems and databases.

Support

Rely on us to take care of your hosting presence. Up-time Service Availability SLA of 100% with 4 hour hardware replacement and 24x7x365 support.

Savings

We aim to make your business budgets go further compared to hosting in-house and by bundling in a range of additional services.

Security

Full confidence in your hosting platform with multiple layers of 'Enterprise Strength' protection, including a dedicated Cisco firewall

FEATURES	BENEFITS
100% uptime guarantee.	Solution redundancy written into your contract.
4-Hour hardware replacement.	Ensures limited downtime in the unlikely event of a failure.
24x7x365 technical support (priority one).	Dedicated technical support in the data centres.
Monitoring, management and patching.	Frees up valuable IT resource to focus on application development instead of system administration tasks.
Simple remote administration and administrative access.	Administer the content and applications on the server yourself.
Bandwidth up to 100Mb.	To ensure your platform can cope with peaks in demand.
Fully supported Cisco firewall included.	Ensure your site is safe from viruses and other malicious code.
Low up-front capital outlay.	Frees up cash to spend in other areas of your business.
Choice of hardware specifications, bandwidth and operating systems.	Allows you to build the platform you need now and in the future.
MS SQL or MySQL database options.	Choose the database that's right for your business.
Operational recovery - back-up and restore option.	Ensures your data is safe, even in the event of failure.
10 working day delivery.	Be up and running in ten working days from the day of your order.
Full resilient ISO accredited data centres and a resilient network.	No single point of failure, ensuring your platform is always available to your customers, 200+ peering agreements.
