

# Blackberry and Hosted Exchange

Blackberry can now be synchronised with your Microsoft Hosted Exchange 2007. It gives you all of the features of Hosted Exchange but on your Blackberry, such as Shared Calendars, Tasks, Contacts and Outlook 2007. Enabling your employees to work in real-time from wherever they are. As Microsoft Exchange is hosted by Vialtus there is nothing for you to install or maintain. All you have to do is sync your Blackberry to your Hosted Exchange service!

## **BENEFITS:**

- Increase the efficiency and productivity of your staff.
- Comprehensive anti-virus and anti-spam.
- Wireless synchronisation.
- Simple to set up and provision.
- Remotely disable lost devices immediately.
- Daily backups of mailbox data.

Networking Infrastructure Solutions

## **BLACKBERRY SYNCHRONISATION SERVICE**

Vialtus' Hosted BlackBerry synchronisation service keeps your BlackBerry users in touch wherever they work. We run the BlackBerry Enterprise Server in our secure infrastructure, in such there is nothing for you to install or maintain.

Available as an optional extra on our Hosted Exchange Service, BlackBerry Synchronisation lets you optimise your IT spending without sacrificing business efficiency.

## **VIALTUS HOSTED BLACKBERRY SYNCHRONISATION GIVES YOU:**

- Secure, wireless 2-way synchronisation with Hosted Exchange in real-time.
- Send and receive emails. Synchronise Calendars, Tasks and Notes.
- Simple operation. With the easy to use Vialtus Administration portal you can set up users in minutes.
- Control costs: no in-house hardware required and you only pay for the users you need.
- Keep your business data secure with encrypted transmission.
- Maximise efficiency of IT budget and mobile workers.
